Contents Volume 155

1 The multidimensional 0–1 knapsack problem: An overview
A. Fréville
22 Resource planning and a depot location model for electric power restoration
S. Wang, B.R. Sarker, L. Mann Jr. and E. Triantaphyllou
44 Solving the hierarchical Chinese postman problem as a rural postman problem
E.A. Cabral, M. Gendreau, G. Ghiani and G. Laporte
51 A hybrid algorithm for identifying global and local minima when optimizing functions with many minima
S. Salhi and N.M. Queen
68 Corporate optimal production planning with varying environmental costs: A grey compromise programming approach
C.-C. Wu and N.-B. Chang
96 The composition of semi-finished inventories at a solid board plant
H.L.T. Wanders, G.J.C. Gaalman and G. Sierksma
112 Design and evaluation of a dynamic capacity apportionment procedure
M. Barut and V. Sridharan
134 Operational capacity allocation for unreliable module-based assembly systems
L. Liu, X.-M. Yuan and J.J. Liu
154 Estimation of means and covariances of inverse-Gaussian order statistics
H. Chen, K.-H. Chang and L. Cheng
170 Sequential inspection strategy for multiple systems under availability requirement
L.R. Cui, H.T. Loh and M. Xie
178 Transient throughput analysis for a series type system of machines in terms of alternating renewal processes
C.-T. Chen and J. Yuan
198 Optimal control of a simple immigration–emigration process through total catastrophes
E.G. Kyriakidis
209 Repetitive tests as an economic alternative procedure to control attributes with diagnosis errors
R.C. Quinino and L. Lee Ho
226 Algorithms for computing the min-transitive closure and associated partition tree of a symmetric fuzzy relation
H. De Meyer, H. Naessens and B. De Baets
239 An approach to generate rules from neural networks for regression problems
R. Setiono and J.Y.L. Thong
251 Inapproximability and a polynomially solvable special case of a network improvement problem
J.Z. Zhang, X.G. Yang and M.C. Cai
258 A note on a decision support system for multiobjective integer and mixed-integer programming problems
M.J. Alves and J. Clímaco

doi:10.1016/S0377-2217(03)00800-2

267 Editorial: Financial risk in open economies
L. Sakalauskas
268 Risk measures and return performance: A critical approach
P. Mazzoleni
276 Analysis of the conditional stock-return distribution under incomplete specification
J.S. Baixauli and S. Alvarez
284 The efficiency of financial futures markets: Tests of prediction accuracy
J. Laws and J. Thompson
299 Retaining students in retail banking through price bundling: Evidence from the Swedish market
M. Mankila
317 Tick size and spreads: The case of Nasdaq's decimalization
O. Loistl, B. Schossmann and A. Veverka
335 Housing credit access model: The case for Lithuania
E.K. Zavadskas, A. Kaklauskas, A. Banaitis and N. Kvederyte
353 Emergent capital markets' efficiency: The case of Romania
V. Dragotă and E. Mitrică
361 PROMISE/scenarios: An interactive method for multiobjective stochastic linear programming under partial uncertainty
B. Urli and R. Nadeau
373 Weak efficiency for multiobjective variational problems
M. Arana-Jiménez, A. Rufián-Lizana and R. Osuna-Gómez
380 A tabu search algorithm for the multi-stage parallel machine problem with limited buffer capacities
B. Wardono and Y. Fathi
402 Solving the resource-constrained project scheduling problem by a variable neighbourhood search
K. Fleszar and K.S. Hindi
414 The computation of the worst conditional expectation
S. Benati
426 Ant-colony algorithms for permutation flowshop scheduling to minimize makespan/total flowtime of jobs
C. Rajendran and H. Ziegler
439 Case study on statistically estimating minimum makespan for flow line scheduling problems
A.D. Wilson, R.E. King and J.R. Wilson
455 A Bayesian method on adaptive preventive maintenance problem
M.-G. Juang and G. Anderson
474 Markovian start-up demonstration tests with rejection of units upon observing *d* failures
D.E.K. Martin
487 Chance constrained programming approaches to congestion in stochastic data envelopment analysis
W.W. Cooper, H. Deng, Z. Huang and S.X. Li
502 Modeling and analysis of high risk patient queues
Q. Wang
516 Expected waiting times at loading stations in discrete-space closed-loop conveyors
Y.A. Bozer and Y.-J. Hsieh

533 Traffic and transportation systems analysis
M. Bielli
535 Adjustment of O–D trip matrices from observed volumes: An algorithmic approach based on conjugate directions
E. Codina and J. Barceló

558 Different methods of traffic forecast based on real data
R. Chrobok, O. Kaumann, J. Wahle and M. Schreckenberg
569 Combined signal setting design and traffic assignment problem
E. Cipriani and G. Fusco
584 Comparative modelling of interregional transport flows: Applications to multimodal European freight transport
P. Nijkamp, A. Reggiani and W.F. Tsang
603 Scheduling multimodal transportation systems
L. Castelli, R. Pesenti and W. Ukovich
616 An efficient genetic algorithm for job shop scheduling with tardiness objectives
D.C. Mattfeld and C. Bierwirth
631 The tree longest detour problem in a biconnected graph
F.-L. Yeh, S.-M. Tang, Y.-L. Wang and T.-Y. Ho
638 Preprocessing and cutting for multiple allocation hub location problems
N. Boland, M. Krishnamoorthy, A.T. Ernst and J. Ebery
654 Reinforcement learning for long-run average cost
A. Gosavi
675 A simulation based approach to the parameter estimation for the three-parameter gamma distribution
W.-K. Pang, S.-H. Hou, B.W.T. Yu and K.W.K. Li
683 Optimal Bayesian sampling acceptance plan with random censoring
J. Chen, S.T.B. Choy and K.-H. Li
695 Sequential process control under capacity constraints
W. Jang and J.G. Shanthikumar
715 Performance and learning in a simulation of oil industry dynamics
P.A. Langley and J.D.W. Morecroft
733 Hypercubes and compromise values for cooperative fuzzy games
R. Brânzei, D. Dimitrov and S. Tijs
741 Estimation of the weights of interacting criteria from the set of profiles by means of information-theoretic functionals
I. Kojadinovic
752 An MCDM approach to portfolio optimization
M. Ehrgott, K. Klamroth and C. Schwehm
771 Tolerant or intolerant character of interacting criteria in aggregation by the Choquet integral
J.-L. Marichal
792 Stabex method for extension of α-polynomial hereditary classes
I.É. Zverovich
796 Contents Volume 155
